## What is this Programme About?

- Designed for anyone who is working in a health-related management role and are looking to develop or advance in their career.
- The course focuses on the theoretical concepts of management and leadership and how these can be applied in practice.
- Students will learn how to plan and deliver service improvements, manage change, work with others to achieve organisational goals, communicate effectively, and make the best use of resources.
- Throughout their studies, students will gain leadership and management understanding and knowledge that can be applied in a wide variety of health care and related management roles.

## Important Things to Note

- 75% of our impact rated as internationally excellent. (Research Excellence Framework 2021)
- This is a purely academic and theoretical MSc looking at leadership and management in healthcare.
- Programme does not include placements or work experience.
